

Finland launches national MWP competition

Description

Finnish Paper Engineers' Association and VTT are supporting 5-10 young PhD students' and post-docs' participation in the Marcus Wallenberg symposium (www.mwp.org) organized in conjunction with the Wallenberg prize ceremonies in Stockholm in September 2014.

The selected young researchers will get their travel costs covered and will participate in the Wallenberg prize ceremony and the symposium. A tour to KTH and Innventia together with Canadian young scientists is also planned in conjunction with the trip.
